P. Alexander Burnham

109 Carrigan Drive Burlington, VT 05405
Phone: 802-379-0548 E-Mail: pburnham@uvm.edu

EDUCATION

University of Vermont **2017-Present**
Ph.D. in biology - (anticipated graduation date: 2021)
UVM - Vermont Complex Systems Center **2018-Present**
Graduate Certificate in Data Science & Complex Systems
University of Vermont **2015-2017**
B.S. in zoology - 2017

RESEARCH INTERESTS

My interests broadly include disease ecology, epidemiological modeling, statistics, pollinator conservation and computer science. Advised by **Dr. Allison Brody and Dr. Nicholas Gotelli**, my graduate work broadly aims to examine how RNA viruses and the microsporidian parasite (*Nosema* spp.) spread from one species of bee to another and how these two pathogens interact within the host. Using a combination of mathematical modeling and empirical work, I hope to better understand how disease spillover, temporal variation in disease load and prevalence influence patterns of co-infection in both native and managed bees.

GRANTS RECEIVED

- **NSF Graduate Research Fellowship Recipient (NSF-GRFP)** 2018
  ($127,000)
- Successfully funded project on temporal variation of RNA viruses and microsporidian parasites in bumble bees 2018
  (Theodore Roosevelt Memorial Fund - $2500.00)
- Successfully funded project on demonstrating the transmission route of RNA viruses from managed bees to wild pollinators 2018
  (NAPPC grant through Honey Bee Health Coalition - $9980.00)
- Successfully funded a project on effects of disease spillover due to migratory beekeeping practices (experiment.com - $5970.00) 2017
- APLE Research Award Recipient (UVM grant $500.00) 2015
- Awarded the Ronald Suiter Prize (funded American Beekeepers Federation conference attendance $1000.00) 2015

PEER REVIEW HISTORY

- Invited to review for Ecology (2018)
- Invited to review for Ecological Applications (2018)
- Invited to review for Ecology (2018)

TEACHING EXPERIENCE

- Graduate Teaching Assistant for Ecology and Evolution laboratory (Fall 2017)
- Graduate Teaching Assistant for Biology 2 for major's laboratory (Spring 2017)
- Guest lecture in Entomology on pest management in honeybees (Fall 2018)
- Guest lecture in Evolutionary Biology on local adaptation (Spring 2017)
- Guest lecture at S. Burlington High school on experimental design (Spring 2017)
- Judge for VT Science Olympiad Div. C – Experimental Design (Spring 2019)

WORK EXPERIENCE

Field Assistant, Lab Tech & data analysist **2015-2017**

- Assisted in field surveys and sample collection at 32 field sites in Northern Vermont
- Assisted in bumblebee rearing and summer field experiment maintenance
- Extracted RNA from samples, measured concentration using spectrophotometry
- Made qPCR master-mixes, set up and ran qPCR plates to determine viral levels in specimens
- Data analyst for field and lab experiments pertaining to RNA viruses in bumble bees

Undergraduate Research in Bumblebee Parasitology **2015-2016**

- Dissected over 300 bumblebee specimens (documenting parasite loads)
- Counted *Nosema* (fungal) spores and tracheal mites in specimens
- Looking at correlations between parasite abundance, species type and geographic location

Graduate Work in Bumblebee Pathology **2016-Present**

- Mathematical modeling of *Nosema* prevalence in response to density
- Parasite competition experiments and models
- *Bombu*s survey to look at viral and parasite loads throughout the year
- *Bombus* pathogen survivability experiments due to overwintering stressors
- RNA virus and parasite coinfection experiments in bumble bee hosts
- Empirical and theoretical work on spillover and transmission
- Looking at correlations between parasite abundance, species type and geographic location

Collaborations with Hamilton College (Dr. Herman Lehman) **2016-Present**

- Research looking at differential success of local and imported honeybee stocks
- Conducting mathematical modeling and data analyses for experiment
- Advising on drug synthesis to treat *Nosema ceranae* in infected honey bees
- Working on three manuscripts with this group

National Honeybee Survey (APHIS) – Assistant Coordinator **2015-Present**

- Identify and contact beekeepers for participation in the survey
- Collect samples from 24 Vermont apiaries (over 200 colonies) for USDA labs
- Identified and documented hive maladies and parasites during hive inspections
- Present findings to local beekeeping clubs and organizations

Island Def Jam Recording Artist & EMI Songwriter **2009-2014**

- Signed by L.A. Reid as lead guitar player of the band "Burnham"
- Released EP *Almost Famous* with Island Def Jam Records
- Radio interviews with Z100, Ryan Seacrest and Billboard
- Performed at promotions for Microsoft product releases (Xbox Kinect and Kin)
- Toured North America on "My World Tour" (Justin Bieber) and on two headlining tours
- Direct Support for Action Item on the "Stronger the Love" tour
- Signed to a publishing deal as a songwriter in the band "Burnham"
- Charted on Billboard top 100 and Radio Disney's top 10 with three singles
- Wrote and recorded with Ryan Tedder (OneRepublic), Benji Madden (Good Charlotte), Claude Kelly (Whitney Houston and Miley Cyrus), Toby Gad (Fergie and Beyoncé)

ACTIVITIES AND HONORS

- Member of Vermont Complex Systems Center 2018-Present
- Member of Vermont Beekeepers Association 2017-Present
- Member of TriBeta National Biology Honors Society 2016-Present
- Member of the UVM Bee Club 2015-Present
- APLE Research Award Recipient 2015
- UVM Merit Scholarship 2014-2017
- Invited to Golden Key International Honor Society 2016-2016
- UVM Dean's List 2014-2015
- CCV President's List Honors 2013-2014
- SAG-AFTRA member 2010-2014
- *International Songwriting Competition* Semifinalist 2014
- Song placed top 3 in the *John Lennon Songwriting Contest* 2013
- *International Songwriting Competition* Finalist 2013
